

# **Printing & Die-Cutting Solutions** **for Engineers and Product Developers**

**Overcoming material, adhesion, and print quality challenges**  
*for graphics, labeling, and die-cut components used in or on  
products, equipment, and industrial machinery.*

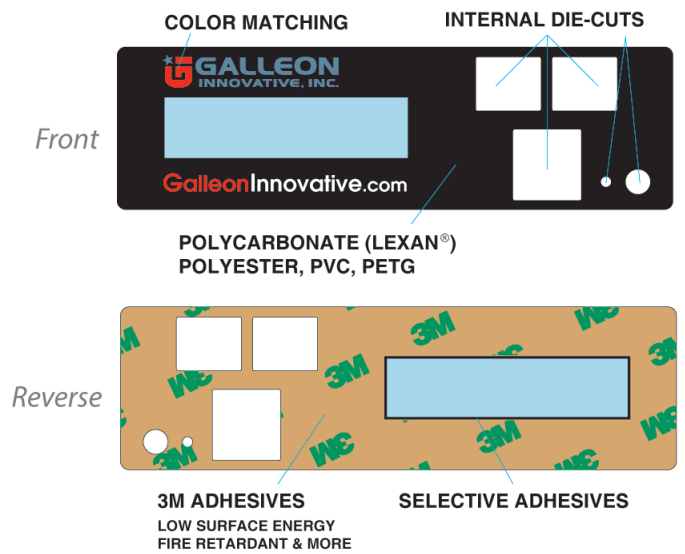

## **We solve problems pertaining to...**

- ▶ *Selecting the right materials & adhesives*
- ▶ *Meeting all dimensional tolerances*
- ▶ *Color matching and Delta E tolerances*
- ▶ *Specialized packaging requirements*
- ▶ *Cost-effective prototyping*
- ▶ *Quality short-run capabilities*
- ▶ *Quick and efficient turnarounds*
- ▶ *Art file and design support*

For over 25 years, Galleon has been providing design, print, and finishing solutions for businesses and manufacturers throughout the United States and world. We specialize in assisting engineers in overcoming challenges related to materials, adhesives, and inks used for the graphics and components in their company's product lines.

## Nameplates & Overlays

Galleon produces custom Nameplates and Overlays for use in Consumer Electronics, Computer/Network Hardware, Machinery, and Industrial Equipment. We help engineers determine the right material construction, adhesive selection, and tolerance considerations so that costly product development delays can be eliminated. In addition to die-cutting with tools, Galleon can digitally die-cut or laser cut materials to reduce turnaround times and minimize costs. Furthermore, we can selectively apply adhesives to safely adhere around sensitive areas.

## Branding & Pre-Spaced Graphics

Galleon produces custom decals used for branding product lines. We can Pantone color match and hold Delta E tolerances for logos, while consistently printing smooth gradients and vivid full color images that enhance the appeal of your products. Galleon also produces pre-spaced graphics on a variety of vinyl and polyester materials, which simulates the appearance of direct imprinting.

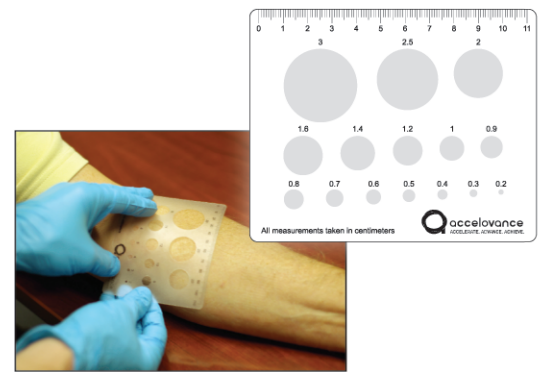

# High Performance Labels & Decals

Galleon produces High Performance Decals for tools and equipment used in challenging environmental conditions. We provide a variety of outdoor durable base materials, overlaminates, and Low Surface Energy adhesives for the most demanding specifications. Galleon can also create unique material & adhesive combinations designed to meet your specific needs.

# Custom Die-Cut Products

Galleon produces custom die-cut products and components. We cut polymers including Polycarbonate (Lexan®), PVC, Acrylic, and PETG to your specifications using steel rule dies, routers, lasers and digital technologies. Galleon specializes in prototyping parts, printed and/or unprinted, quickly and cost-effectively to meet your customers' demands and your company's budget.

# Instruction Sheets, Brochures & Booklets

In addition to custom graphics and components, Galleon produces printed literature relevant to your product lines. We can cost-effectively produce items such as instruction sheets, booklets, manuals, and brochures. These items can be of great benefit in defining your products to the marketplace, guiding technicians in the field, and instructing end users with assembly and use.

# **GALLEON** *adds value* *at each engineering and production stage.*

## **Engineering & Design:**

You'll get expertise in graphic design, branding, and preparing production-ready files from your technical drawings or CAD files. We'll find creative solutions to projects unique to your company and make suggestions for materials, inks, adhesives, and production techniques.

## **Proofing & Prototyping:**

We'll proof and prototype graphics and parts for you to test, and make hassle-free changes and adjustments as needed. We'll meet and exceed your critical dimensions, die-cut tolerances, and environmental requirements. If requested, we'll confirm Delta E color matching for you.

## **Print Production & Die-Cutting:**

Galleon combines traditional, digital, and proprietary technologies to offer the most effective solutions to your graphics and die-cut parts needs. We use (PPAP) Production Part Approval Process procedures to ensure strict quality control.

## **Converting & Finishing:**

You'll receive extensive finishing, converting, and fulfillment options including cutting, folding, binding, laminating, custom packaging and shipping. Products are packaged/boxed to your specifications with certificates of compliance.

## **Continuing Partnership:**

Galleon will make communication with you a high priority, and we'll partner with you to strengthen our customer/vendor relationship. We'll continuously work to exceed your expectations and improve the ease of doing business with us.
